## Physics Puzzle Game Comes Alive in a Crazy, Colorful World of Cute Little Monsters!

### GAME OVERVIEW

Triples are cute little monsters that come from the planet Trigalax, a planet located on the outer rim of a galaxy far, far away. A long time ago, a nearby star exploded above their beloved planet, creating a huge swirling vortex that sucked up all its inhabitants and sent them onto a strange new planet in a parallel universe. Lost and scattered all over this incredible new world, Triples are struggling to find ways to get back home. Only by overcoming mind boggling puzzles and out-of-this-world obstacles can they do so. Magical little creatures, Triples have special powers when they come together in groups of 3 or more, and only by joining together can they be teleported back to their home world. *Triple Trouble* tests all of a player's skill to advance to the game's higher levels – it's easy to learn but hard to master!

### FEATURES:

- **Match-3 game mechanics:** earn points by flinging three or more Triples of the same color into a common space so they connect together
- **Easy-to-use launch mechanism:** fling Triples with a simple swipe forward of the finger
- **Realistically reacting world:** 12 beautiful settings feature obstacles such as fans, springs, and moving objects that are both fun and difficult to master
- **Addictive physics puzzles:** 48 unique levels provide hours of entertainment with surprising and numerous challenges
- **Leaderboards & Achievements on Game Center:** allow you to compare with friends
- **Facebook and Twitter integration:** post high scores for all to see
- **Comprehensive help function:** in-game tutorial for beginners
- **Languages:** English, Spanish, Italian, French, and German
